

HIMANSHU GROVER

Senior Product Designer | B2B SaaS · Enterprise Platforms · Design Systems · Interaction Design · AI-Enhanced UX

[Design Portfolio](#) · [Case Study](#) · [LinkedIn](#) · 9711692602 · himanshugrover2710@gmail.com

Profile Summary

Senior Product Designer with 6.8 years of experience delivering end-to-end product design for B2B SaaS, enterprise logistics, AI-powered platforms, and eCommerce. Expert in interaction design, design systems governance, and component library development. Proven track record of improving operational efficiency, reducing user drop-offs, and increasing engagement through data-driven UX and usability testing. Strong cross-functional collaborator with Product, Engineering, and Business stakeholders across agile, async, and distributed teams. Skilled in AI-assisted prototyping, WCAG 2.1 accessibility standards, and translating complex workflows into intuitive, scalable user experiences.

Core Skills

Product Design: End-to-End Product Design, Product Discovery, UX Strategy, MVP Design, Feature Prioritization, Conversion Optimization, Roadmapping, KPI-Focused Design, Stakeholder Management

UX Design: Interaction Design, User Research, Personas, Journey Mapping, User Flows, Information Architecture, Wireframing, Prototyping, Usability Testing, A/B Testing

UI Design: Design Systems, Component Libraries, Design Tokens, Dashboard UX, Data Visualization, Responsive Design, Accessibility (WCAG 2.1), Motion Design, Visual Design

Tools: Figma (Advanced: Auto-layout, Components, Prototyping, Library Management), Adobe XD, Sketch, FigJam, AI Prototyping (Claude AI, ChatGPT), Jira, Git

Technical: HTML/CSS, React (Working Knowledge), Tailwind (Familiarity), Vercel

Methods: Agile (Scrum), Design Thinking, Design Sprints, Human-Centered Design, Async Remote Collaboration, Cross-functional Collaboration

Experience

Senior UI/UX Designer

Optimal Virtual Employee — Client: Apate AI — Jun 2025 – Nov 2025

AI Cybersecurity & Fraud Prevention Platform

- Led end-to-end redesign of AI-powered fraud detection dashboards, improving analyst efficiency by 20% and reducing average investigation time by 15% through interaction design and workflow simplification.
- Designed contextual AI nudges, intelligent action panels, and progressive disclosure patterns to accelerate fraud review decisions for enterprise security analysts.
- Built and maintained a component library and design tokens that standardised visual language across 8+ dashboard screens, reducing design inconsistencies by ~40%.
- Conducted stakeholder workshops and moderated usability testing sessions with 12+ analysts and engineers to validate design hypotheses and align vision with execution.
- Leveraged AI prototyping tools to rapidly iterate on complex interaction flows, cutting feedback cycles by 30% and enabling async stakeholder reviews across a distributed team.
- Applied WCAG 2.1 accessibility standards throughout — ensuring colour contrast, keyboard navigation, and screen-reader compatibility across all deliverables.

Senior Product Designer

Shipease Technologies (app.shipease.in) — Dec 2023 – Jun 2025

Enterprise Logistics SaaS Platform — 5,000+ Monthly Active Users

- Owned end-to-end product design for logistics dashboards, shipment tracking, and operations workflows serving 5,000+ monthly active users — from discovery and user research through to pixel-perfect, developer-ready specs.

- Redesigned 3 core operational workflows, reducing manual intervention steps by 35% and improving task completion rates by 22% as measured through analytics and usability testing.
- Architected a scalable design system from zero — including component libraries, design tokens, interaction patterns, and accessibility guidelines — reducing design and development cycles by 30% and adopted as the org-wide source of truth.
- Led design critiques, facilitated 10+ cross-functional discovery workshops, and mentored 2 junior designers through structured feedback sessions and sprint retrospectives.
- Partnered with Product Managers and Engineering leads to define product roadmaps, prioritise features against business KPIs, and deliver MVPs iteratively in a fast-paced agile environment.
- Ran regular A/B testing and heuristic evaluations to validate interaction design decisions, improving navigation efficiency and reducing drop-offs across key user flows.

UI/UX Designer

Chetu Inc. — Apr 2023 – Dec 2023

Enterprise SaaS — Multi-client Delivery

- Led end-to-end UX design for 4+ enterprise SaaS applications across industries — from stakeholder discovery workshops to high-fidelity prototyping and developer handoff.
- Designed responsive, accessible interfaces for desktop and mobile platforms serving 1,000+ enterprise users, maintaining WCAG 2.1 compliance across all deliverables.
- Built reusable component libraries and scalable interaction design patterns that improved cross-project design consistency by ~25% and reduced design rework.
- Facilitated requirement workshops and design reviews with cross-functional stakeholders, aligning business goals with user needs and reducing revision cycles by 20%.

UI/UX Designer

GS Property Cleaning — Aug 2022 – Mar 2023

Two-sided Service Marketplace

- Redesigned end-to-end booking flows and admin dashboard for a two-sided service marketplace, increasing user engagement by 25% and improving task completion rates by 18%.
- Reduced user drop-offs by 30% through interaction design improvements, simplified user flows, and friction-reduction across 6 key booking journey touchpoints.
- Delivered responsive, accessible interfaces aligned with business and customer needs — tested across 5 device breakpoints with 0 critical accessibility failures.

Lead Associate — UI/UX Designer

Magic Edtech — Mar 2019 – Aug 2022

Accessible E-learning Platforms — Multi-institution Deployment

- Designed accessible e-learning products deployed across 15+ educational institutions — improving student engagement by 20% through user-centred interaction design and WCAG-aligned UI.
- Built modular component libraries and reusable UI patterns used across 5+ products, ensuring visual and interaction consistency at scale and reducing design time by ~25%.
- Mentored 3 junior designers through structured design reviews, usability testing protocols, and critique sessions — elevating overall team output quality.
- Conducted 20+ usability testing sessions and translated qualitative research findings into iterative, data-backed product improvements across the platform suite.

Notable Projects

- **B2B SaaS · 10,000+ sellers:** Designed end-to-end aggregator panel enabling sellers to manage shipments across multiple logistics providers from a single interface. Owned full UX from discovery through high-fidelity Figma specs — covering onboarding flows, order management dashboard, rate comparison, and real-time tracking modules.
- **AI Cybersecurity · Enterprise B2B:** Solo end-to-end redesign of an AI-powered fraud detection and scam protection platform for enterprise security analysts. Designed investigation workflows, contextual AI nudge systems, alert triage dashboards, and case management flows — improving analyst efficiency by 20% through interaction design and cognitive load reduction.
- **Client Project · Live Product:** Designed end-to-end UX across 4 distinct role-based panels — storefront, vendor panel, admin panel, and architect panel — for a premium home essentials eCommerce platform.

Solved complex multi-user interaction design challenges: role-specific dashboards, product catalogue management, order workflows, and partner onboarding flows. Live product serving premium brands including Kohler and Brizo.

- **Personal Project · Solo End-to-End Design:** Designed a modular enterprise sustainability dashboard enabling organisations to track, analyse, and report carbon emissions aligned with GHG Protocol standards. Delivered full design system, emissions tracking dashboard, sustainability reporting module, and strategy planning interface — from user research and information architecture through to pixel-perfect UI.

Education

B.Tech, Electronics and Communication Engineering

Bharati Vidyapeeth's College of Engineering, Delhi (GGSIPU) — 2017

Diploma, Electronics and Communication Engineering

Guru Nanak Dev Polytechnic, Delhi — 2014
