

HIMANSHU GROVER

Senior UI/UX Designer | B2B SaaS · AI Products · Design Systems · Interaction Design · End-to-End Product Delivery

himanshugrover.vercel.app · [LinkedIn](#) · 9711692602 · himanshugrover2710@gmail.com

Profile Summary

Senior UI/UX Designer with 6.8 years delivering end-to-end digital products across B2B SaaS, AI-powered platforms, enterprise logistics, and eCommerce. Expert in product discovery, interaction design, design systems governance, and AI-augmented workflows. Proven track record of driving measurable business outcomes — including a 6x growth in monthly orders following a full platform redesign, and a 20% improvement in analyst efficiency on an AI fraud detection platform. Technically fluent across HTML, CSS, and React — which means faster, more accurate handoffs and fewer revision cycles with engineering teams. Strong cross-functional collaborator with PMs, engineers, and stakeholders across agile, async, and distributed teams. Comfortable in fast-moving, ambiguous environments where design thinking and product impact both matter.

Core Skills

Product Design: Product Discovery, UX Strategy, End-to-End Product Design, MVP Design, Feature Prioritization, Roadmapping, KPI-Focused Design, Stakeholder Management, Conversion Optimization

UX Design: Interaction Design, User Research, Personas, Journey Mapping, User Flows, Information Architecture, Wireframing, Prototyping, Usability Testing, A/B Testing

UI Design: Design Systems, Component Libraries, Design Tokens, Dashboard UX, Data Visualization, Responsive Design, Accessibility (WCAG 2.1), Motion Design, Visual Design

Design Tools: Figma (Advanced: Auto-layout, Components, Prototyping, Library Management), Adobe XD, Sketch, Figma

AI-Augmented Design: Cursor (rapid prototyping & design-to-code bridging), Claude AI, ChatGPT, Figma AI — used to accelerate design workflows, iterate faster, and reduce handoff friction

Technical Fluency: HTML5, CSS3, React.js, JavaScript (ES6+), Tailwind CSS, Git, Vercel, CodeSandbox — sufficient to prototype in code, review implementations, and collaborate fluently with engineering teams

Data & Analytics: Metabase (Setup, Integration & UI Customisation), Analytics-driven design, KPI dashboards

Methods: Agile (Scrum), Design Thinking, Design Sprints, Human-Centered Design, Async Remote Collaboration

Experience

Senior UI/UX Designer

Optimal Virtual Employee — Client: Apate AI — Jun 2025 – Nov 2025

AI Cybersecurity & Fraud Prevention Platform — Enterprise B2B

- Led end-to-end redesign of AI-powered fraud detection and scam protection dashboards — improving analyst efficiency by 20% and reducing average investigation time by 15% through interaction design and workflow simplification.
- Designed contextual AI nudges, intelligent action panels, alert triage dashboards, and case management flows using progressive disclosure patterns to reduce cognitive load for enterprise security analysts.
- Set up and configured Metabase from scratch for the analytics layer — integrating it into the product and customising the UI to match the platform design system, ensuring a seamless, brand-consistent analyst experience.
- Built and maintained a component library and design tokens standardising visual language across 8+ dashboard screens, reducing design inconsistencies by ~40%.
- Leveraged Cursor for AI-assisted development and AI prototyping tools to iterate on complex interaction flows — cutting feedback cycles by 30% and enabling async stakeholder reviews across a distributed team.
- Conducted stakeholder workshops and moderated usability testing sessions with 12+ analysts and engineers to validate design hypotheses and align vision with execution.

Senior Product Designer

Shipease Technologies (app.shipease.in) — Dec 2023 – Jun 2025

Enterprise Logistics SaaS Platform — Full Platform Redesign — 6x Order Growth

- Led full platform redesign from scratch — driving monthly orders from 1 lakh to 6 lakh in a single month post-launch (6x growth), directly attributable to UX improvements across onboarding, order creation, and core workflows.
- Introduced 10+ new features including rate calculator, AI-driven courier selection, auto-rules engine, branded tracking pages, quick actions, support ticket system, subscription model, and editable labels — transforming a struggling product into a platform sellers trusted.
- Redesigned order creation from a single overwhelming form into a guided step-by-step flow — removing redundant fields, pre-filling onboarding data, and reducing friction at every stage, improving task completion rates by 22%.
- Architected a scalable design system from zero — component libraries, design tokens, interaction patterns, and accessibility guidelines — reducing design and development cycles by 30%, adopted as org-wide source of truth.
- Used Cursor AI to accelerate prototyping and design-to-production handoff — reducing implementation friction and enabling faster iteration cycles with engineering teams.
- Led design critiques, facilitated 10+ cross-functional discovery workshops, and mentored 2 junior designers — partnering with PMs and Engineering to define roadmaps and deliver MVPs iteratively in agile sprints.

UI/UX Designer

Chetu Inc. — Apr 2023 – Dec 2023

Enterprise SaaS — Multi-client Delivery

- Led end-to-end UX design for 4+ enterprise SaaS applications — from stakeholder discovery workshops to high-fidelity prototyping and developer handoff.
- Designed responsive, accessible interfaces for desktop and mobile platforms serving 1,000+ enterprise users, maintaining WCAG 2.1 compliance across all deliverables.
- Built reusable component libraries and scalable interaction design patterns — improving cross-project design consistency by ~25% and reducing design rework.
- Facilitated requirement workshops and design reviews with cross-functional stakeholders, aligning business goals with user needs and reducing revision cycles by 20%.

UI/UX Designer

GS Property Cleaning — Aug 2022 – Mar 2023

Two-sided Service Marketplace

- Redesigned end-to-end booking flows and admin dashboard — increasing user engagement by 25% and improving task completion rates by 18% through interaction design improvements.
- Reduced user drop-offs by 30% through simplified flows and friction-reduction across 6 key booking journey touchpoints.
- Delivered responsive, accessible interfaces across 5 device breakpoints with zero critical accessibility failures following WCAG 2.1 review.

Lead Associate — UI/UX Designer

Magic Edtech — Mar 2019 – Aug 2022

Accessible E-learning Platforms — Multi-institution Deployment

- Designed accessible e-learning platforms deployed across 15+ educational institutions — improving student engagement by 20% through user-centred interaction design and WCAG-aligned UI.
- Built modular component libraries and reusable UI patterns used across 5+ products — ensuring visual and interaction consistency at scale, reducing design time by ~25%.
- Mentored 3 junior designers through structured design reviews, usability testing protocols, and critique sessions — elevating overall team output quality.
- Conducted 20+ usability testing sessions and translated qualitative findings into iterative, data-backed product improvements across the platform suite.

Notable Projects

- **B2B SaaS · 10,000+ sellers:** End-to-end product design — rate calculator, AI-driven courier selection, auto-rules engine, branded tracking pages, and subscription model. Monthly orders grew 6x post-launch.

- **AI Cybersecurity · Enterprise:** Solo end-to-end redesign — investigation workflows, AI nudge systems, alert triage dashboards, case management flows. Metabase configured and customised from scratch. Analyst efficiency +20%.
 - **Client · Live Product:** End-to-end UX across 4 role-based panels — storefront, vendor, admin, architect — for a live premium home essentials platform serving Kohler and Brizo.
 - **Personal · Solo End-to-End:** Enterprise sustainability dashboard on GHG Protocol standards — modular design system, emissions tracking, reporting and strategy modules. From user research to pixel-perfect UI.
-

Education

B.Tech, Electronics and Communication Engineering

Bharati Vidyapeeth's College of Engineering, Delhi (GGSIPU) — 2017

Diploma, Electronics and Communication Engineering

Guru Nanak Dev Polytechnic, Delhi — 2014
